

FOR IMMEDIATE RELEASE

## **Cordjia Marine Solutions Introduces PierVantage™ Boatyard Management Solution**

Wilmington, DE (February 16, 2009) – Cordjia Marine Solutions (CMS), which develops forward-thinking marine management solutions, announced today the launch of PierVantage™, the first and only integrated, web-based boatyard management software that truly helps boatyards lower costs, operate more effectively, and increase customer satisfaction.

PierVantage, [www.piervantage.com](http://www.piervantage.com), is an easy-to-use, comprehensive marine industry management software solution that integrates financial accounting, purchasing and inventory management, boat repair management, automated work flows, invoicing and employee time management for boatyards and boat-building operations.

PierVantage is available nationwide and backed by a No-Risk, All-Reward Commitment, which includes a 90-day unconditional money-back guarantee.

“We worked directly with some of the nation’s leading boatyards to define, map and optimize business processes for every critical activity, from billing to boat repair workflows to project management to employee timekeeping,” explained Navroze Eduljee, CEO and Founder of Cordjia Marine Solutions. “We ensured that our hand-crafted system will make their lives easier, their customers happier and more loyal, and their businesses more profitable.”

Because it is Web-based software, PierVantage will enable boatyards to slash their hardware and technology costs by eliminating the need for expensive software upgrades, onsite servers and technology staff or consultants, Eduljee said. PierVantage is scalable—new users can be added with a few clicks—and also improves security by protecting boatyard information in a Tier 1 data center and encrypting all data.

For more information about the PierVantage boatyard management solution and a free product demonstration, visit [www.piervantage.com](http://www.piervantage.com)

**About Cordjia Marine Solutions** – Cordjia Marine Solutions, [www.cordjiamarinesolutions.com](http://www.cordjiamarinesolutions.com), is working with leading marinas and marine suppliers to develop customized and comprehensive software applications that lower costs and improve customer service and satisfaction. The company’s dedicated team of information technology experts is currently developing PierVantage, the first and only integrated marine management solutions available through a Web-based, “no-hassle, no hardware” portal and carrying a 90-day, money-back guarantee.
